such a sick state.

Father spoke to Prof. Crawford at U.T.S. about securing my Junior Matric and he immediately recommended it to the board but I have had no word of it yet.

I would be very grateful if you would see what could be done on my behalf because I would not be able to

all subjects and obtained something over sixty per cent on the whole.

I then went out on the farm for one month, when my brother took sick and I had to come back home. After his death, on account of the alarming condition of my mother. I was told by the doctor & Father that it would be absolutely impossible for me to leave mother in

continue to school another year as I will be existing right after Christmas. Thanking you once again I remain

Yours very truly

Dr. A. C. McKay.

When it was announced last Spring that all boys who would go out on the farm for three months would get their exams, after passing the Easter tests, I decided to do so. When the test results came out I found that I had passed completely in

P.S.

The applicant Bourden is now 17 yrs and 6 months old.

A letter he wrote to Dr A. C. McKay of Technical School is also enclosed.

and been there continuously since the first contingent crossed over. I ask that in view of the circumstances he be permitted to have entrance into School of Practical Science after passing his honor matriculation.

He was recommended by Prof Crawford of U.C.C. for his matriculation.

I trust Sir that you will favorably consider this request. I have the personal acquaintance of Dr J.L. Hughes, Dr A.C. McKay, Technical School Inspector Cowley &c and am Chief Accountant in connection with the Board of Education.

I am Dear Sir
Yours respectfully

Sir Robert Falconer
University of Toronto

Dear Sir, This will introduce my son Borden Burns who attended the University Boys school until May last, he was one of five to pass his exams at that time, and according to regulations went on a farm for one month and performed his work with credit, his brother took ill and passed away and owing to the continued illness of his mother, he was unable to perform the balance of regulation. I have an older son in France
